

India 2047

Towards Rule of Islam in India

Internal document; Not for circulation

Bismillah hir-Rahman nir-Rahim

Present state of Muslim community

The Muslims are the second largest religious community in the country. India has the largest concentration of Muslims outside the member countries of the Organisation of Islamic Cooperation (OIC) and the second largest (after Indonesia). It is found that 9 districts in the country including Lakshadweep and 8 districts of Jammu and Kashmir have a Muslim population of 75% or above. Alas, once the ruling community of the country, Muslims have now been relegated as the second grade citizens.

When we search for reasons for the present pathetic conditions of Muslims, we have to start right from the British Raj. From the very beginning, the foreign rulers adopted discriminatory policies, hostile towards Muslims and sympathetic towards Hindus. The privileges earlier enjoyed by Muslims in terms of property rights, etc. were withdrawn, Government jobs were denied and trade facilities were restricted. Since the dawn of the independence, the Government of India dominated by the upper caste Hindus, adopted discriminatory measures against Muslims.

It is a well-known fact that the Indian Muslims are systematically and increasingly getting marginalised in their homeland. Today all over the North and North East India, in mines, in quarries and building sites, Muslim children compete with Dalit children. The rise of sectarian Hindutva forces has further aggravated the socio-economic and political conditions of Muslims. The political deprivation of Muslims has come so low that the Government of India does not bother to consult Muslims even on the matters concerning Shariat.

Muslim community of India, being the second largest in the world, bears the heavy responsibility of providing a successful survival model to the world against the onslaught of the anti-Muslim forces. But it is severely deprived of good organisation or leadership. Whether it be by the efforts of the anti-Muslim sources or by intrinsic nature of the Muslims, the community divides on very silly differences. By this it becomes difficult to provide resistance against the advances of the Hindutva forces making the community stronger and bolder.

Though there are many self-proclaimed leaders at the lowest levels from Mohalla upwards there is no vision based navigators for the community in these testing times. The world looks at Indian Muslims as a model and the Indian Muslim community hopelessly waits for miracle to happen. Sooner or later, a leadership has to emerge from within the community to protect it from the

immediate threats and to provide a real development model for the deprived sections of the society based on freedom, truth and equal enforcement. This is the role Popular Front of India sees itself in.

Here comes India 2047

Hundred years are not even a ripple in the flow of human history, but to generations, it means long drawn out years of hope, despair, retreat, advances, gains and pains. 2047 CE is not a watershed in history, but it signifies the end of a century of the independent India and the beginning of a new one pregnant with changes, positive and negative, cataclysmic or otherwise. We dream a 2047 where the political power has returned to the Muslim community from whom it was unjustly taken away by the British Raj. The roadmap towards this first starts with the socio-economic development of Muslim community for which a separate roadmap was already provided in the name of Empower India Foundation. Socio-economic development and the resultant empowerment would lead also to political empowerment which would then act as a virtuous cycle towards better socio-economic development and further political power. We have given ourselves a target of 2047 CE to bring about an Islamic Government in this country.

If we look into history of Islam, Muslims were always in minority and for victory we do not need to have a majority. Popular Front of India (PFI) is confident that even if 10% of total Muslim population rally behind it, PFI would subjugate the coward majority community to their knees and bring back the glory of Islam in India. To achieve this goal, this roadmap has been prepared to be kept in mind by all the PFI leaders and accordingly guide the PFI cadres, in particular, and Muslim community, in general towards this goal. PFI cadres and Muslim youths should be repeatedly told that they all were working for Deen. Allah had created the world/*Kayanaat* and Muslims were made for two reasons, the first to establish the law of *Allah* and secondly Muslims are *Daai* on earth. This should always be kept in mind that the rule of Islam has to be established.

Stages of progression towards Islamic rule

We foresee a four stage progress towards reaching our goal:

In the first stage, we need to establish ourselves wherever Muslims are available and try to unite them all under the flag of Popular Front of India irrespective of their sects and affiliations. For this one needs to repeatedly remind Muslim community of its grievances and establish grievances where there is none. All our frontal organisations including Party should be focussed on expanding and recruiting new members. Simultaneously, we have to establish an

Islamic identity among everyone beyond the concept of being an Indian. We would begin to recruit and train members into our PE department wherein they should be given training on attacking and defensive techniques, use of swords, rods, and other weapons.

In the second stage, we have to strengthen and spread the narrative of grievances far and wide, endeavour for mass mobilization under the leadership of PFI and use violence selectively to demonstrate our strength and terrorise our opponents, while limiting exposure of our trained cadres to security forces. From all the cadres who are being given PE, those with talent are to be spotted and recruited to be given advanced training on weapons including fire-arms and explosives. Meantime, Party should utilise concepts such as 'National Flag', 'Constitution' and 'Ambedkar' to shield the real intention of establishing an Islamic rule and to reach out to SCs/STs/OBCs. We would reach out to executive and judiciary and also strive to infiltrate our members in these at all levels in order to gather information and get favourable outcome in matters of our interest. Further, liasoning is to be established with foreign Islamic countries for funding and other help.

In the third stage, Party should form close alliances with SCs/STs/OBCs and win elections at all levels at least in few seats. The Party should gain the trust of 50% of Muslims and 10% of SCs/STs/OBCs in this stage. Political victories should be utilised to further expand the organisation and the Party. We need to create a split between RSS and SCs/STs/OBCs by projecting that RSS is an organisation interested only in the welfare of upper caste Hindus. We need to discredit existing so-called secular parties by questioning their secularism and projecting the need for Muslims and SCs/STs/OBCs to have their own parties to project their interest. All the frontal organisations should continue the work already being undertaken in previous stages. The PE department should project its strength through the discipline of its members, uniformed marches and intervening physically in the defence of the community wherever required and attacking anyone against its interest. Stockpiling of weapons and explosives should be done in this stage.

In the final stage, Party should become the undisputed leader and representative of entire Muslim community by sidelining all other Muslim organisations. The Party should also gain the trust of 50% of SCs/STs/OBCs and emerge as their representative too. At this stage, this vote share would be sufficient for the Party to gain political power at national level. Once in power, all important positions in the executive and judiciary as well as the Police and Army are to be filled with loyal cadres. The doors of all Government departments

including Army and Police would be opened to be filled with loyal Muslims and SCs/STs/OBCs to correct the past injustice and imbalances in their recruitment. The actions of our PE department would become more overt and the number of cadres would be exponentially increased at this stage. Those against our interest are to be eliminated. These PE cadres would also act as a safeguard against influence of security forces by our opponents. When we have enough trained cadres and stock piling of arms, we would declare a new Constitution based on Islamic principles. External forces would also come for help at this stage. There would be systematic and wide spread elimination of our opponents and return of Islamic glory.

Current Actionable points

Establishment of Grievances

We have come a long way forward on this task. Fortunately, the rising Hindutva forces, RSS and their puppet Government at the centre are giving us enough issues to foment grievances of our brothers and made them to believe that the RSS controlled Union Government is hell bent to suppress Islam in the country. The deficit of trust between the Government and the Muslim community has become so wide. Muslim community should always be reminded about the atrocities perpetrated upon them during demolition of Babri Masjid, communal riots and lynching of Muslims. There must be concerted efforts by all State units to make Muslims believe that the RSS led Government was planning to declare India a Hindu Rashtra and drive Muslims out of the country.

Mass Mobilisation

Mass mobilisation is one of the priority area for our organisation for regaining glory of Islam. Through the mass mobilisation agenda, we aim to rally as many Muslims as possible behind PFI for which we have to reach them and educate them the seriousness of the situation. Mass mobilisation includes three components i.e. Inclusiveness, Outreach and Engagement (mobilisation).

Being an inclusive organisation means Popular Front should have space for everyone from the community who want to contribute towards our cause. Outreach means approaching the community by educating them about the issues and setting priorities for the community. Engagement on mobilisation means not just limiting our outreach to one way education, but also engaging the masses to participate in our agenda. Bringing the people to the forefront to strive for their rights will be the expected result of mass mobilisation. To engage the mass, all

the present platforms from within the organisation should be used and also existing community platforms should be influenced.

PFI in every house strategy

We are going to reach the Popular Front in every house of our nation. Our target is to recruit all eligible members of all families into the organisation, party and other frontal wings. If it is not possible,

Recruit at least one of them to the Organisation; if not

Recruit at least one to the party; if not

Recruit any of them to any of our frontals, if that is also not possible

Make them readers of our magazines/articles

OR, at least readers/viewers at our social media postings

In short, ensure all families are keeping in touch with the organisation in any of various possible ways and participate in PFI programmes to the maximum extent possible.

Recruitment and Training of Members

We must be aware of the fact that we are the only movement in these testing times that has stood up against the fascists. We have not got any citations or certifications from anybody, but we read in the eyes of our supporters the hope they reposed in our organisation.

The appeal PE has among the public is unknown to us. Similarly, the fear our PE induces in the hearts of the oppressors is also unknown to us. We have to prove both of them right. Strength in the hands, along with PE techniques will only increase our own confidence, our determination and deliver effect in our blows.

State units should continue organising PE classes at grass-root level on priority basis under the camouflage of yoga sessions and Healthy People Healthy Nation campaign. Our well-trained PE trainers are being sent State to State to impart training to PFI members in weapon handling and explosives. We have shortage of trainers and numbers of potential trainees are very large. Resourceful candidates should be identified and trained to become Basic PE course instructors, secondary PE course instructors and PE masters. Further, we do not have so far proper secluded training centres/locations for conducting advanced PE courses. To meet the challenge, State units should acquire plots in Muslim dominated localities or remote locations in order to set up proper training facilities and depots for stock-piling of arms and explosives. Locations of these centres should be under the knowhow of only selected persons. We have a long way to cover in order to train all PFI cadres and sympathisers in basic PE as well

as build our own dedicated army of trained PE cadres before we can achieve our goal.

Collection of Information against Hindu/Sangh Parivar leaders

It is imperative to collect and keep ready detailed information about the personal details of Hindu/RSS leaders and locations of their offices before the stage of final show down comes. The information wings at various levels should keenly follow up and update their data-base. Tracking their activities would also help us in responding against their atrocities. Keeping in view the importance of information wing in the roadmap of our final goal, the working of the wing at all levels needs to be strengthened and sharpened.

External Help

In the scenario of full-fledged show down with the State, apart from relying on ours trained PE cadres, we would need help from friendly Islamic countries. In the last few years, PFI has developed friendly relationship with Turkey, a flag-bearer of Islam. Efforts are on to cultivate reliable friendship in some other Islamic countries.
