Russian Scholar Warns Of 'Secret' U.S. Climate Change Weapon

The heatwave has caused forest and peat fires across Russia

July 30, 2010

By Ashley Cleek

As Muscovites [suffer record high temperatures this summer](#), a Russian political scientist has claimed the United States may be using climate-change weapons to alter the temperatures and crop yields of Russia and other Central Asian countries.

In a recent article, Andrei Areshev, deputy director of the Strategic Culture Foundation, wrote, "At the moment, climate weapons may be reaching their target capacity and may be used to provoke droughts, erase crops, and induce various anomalous phenomena in certain countries."

The article has been carried by publications throughout Russia, including "International Affairs," a journal published by the Foreign Ministry and by the state-owned news agency RIA Novosti.

In an telephone interview with RFE/RL, Areshev appeared to back off from claims he made in the article, saying that he was merely positing a theory.

"First of all, I would like to say that what I wrote in that article, even the citations, does not in any way claim to be a final truth. It is, if you will, speculation, in other words, the definition of an hypothesis," Areshev said.

Moscow is currently sweltering under record temperatures. On July 29 Moscow suffered its hottest day ever, with temperatures hitting 39 degrees.

But Russia isn't the only country suffering from a heat wave this summer. Indeed, the United States is also experiencing record temperatures. On July 24, temperatures in Washington, D.C., hit 37.7 degrees, and local weather services issued heat warnings for the first time this summer.

Areshev agrees that it is also hot in the United States, but notes that the United States is significantly farther south than Russia, meaning that such high temperatures are not so surprising there.

The U.S. National Oceanic and Atmospheric Administration, however, announced in July that land and ocean temperatures throughout the world were the highest ever, since they began tracking global temperatures in 1880.

Conspiracy Theories

In the article, Areshev voiced suspicions about the High-Frequency Active Aural Research Program (HAARP), funded by the U.S. Defense Department and the University of Alaska.

HAARP, which has long been the target of conspiracy theorists, analyzes the ionosphere and seeks to develop technologies to improve radio communications, surveillance, and missile detection.

Areshev writes, however, that its true aim is to create new weapons of mass destruction "in order to destabilize environmental and agricultural systems in local countries."

Areshev's article also references an unmanned spacecraft X-37B, an orbital test vehicle the Pentagon launched in April 2010. The Pentagon calls X-37B a prototype for a new "space plane" that could take people and equipment to and from space stations. Areshev, however, alleges that the X-378 carries "laser weaponry" and could be a key component in the Pentagon's climate-change arsenal.

The Pentagon was not immediately reachable for comment.

Areshev also cites the U.S. government's effort to use rain and cloud coverage to block the Vietnam Army's supply routes during the Vietnam War. He insisted, however, that he was not a conspiracy theorist.

"My comments were not made in order to accuse the U.S., or any other country, of consciously influencing Russia," Areshev said. "That would be quite ridiculous."

Asked whether or not Russia was also experimenting with climate-control methods, Areshev said since he was not a member of the government, he did not have information about such projects.

LOL! this is truly laughable. I suppose the USA is also responsible for Russian traffic deaths, Russian drunkenness, and Russia's low birth rate as well right? Areshev appears to be a first-class moron. I suppose we can believe in conspiracies too. Maybe Russia is responsible for the BP oil spill, or the Kalamazoo River oil spill, or the various droughts that have hit the US in recent years. Maybe Russia was even behind 9/11? LOL

As the first person to figure out the US Military's weather modification project and the only person on the planet to make successful weather forecasts around the USAF's weather modification project since 2002. The Russian Scholar is correct to an extent. The US Govt is responsible for the heat waves across the Central and Southern US since May as their #1 priority has been to create a ridge of high pressure over the Gulf Oil Spill to create calm winds to allow clean up activities to occur realitively un-abaited. If one looks at the surface temperature anomaly map produced by NOAA and then looks at the predominate jet stream track since May, one would see a clear correlation between the start of the record heat and where it ends up in Russia. It starts over the Gulf of Mexico, right where the USAF has built that high pressure since May. Cheers to the Russian Scholar for stepping up and suggesting this.

I think it's commendable for you, as an American, to at least give this speculation some thought. I see some of your fellow Americans making fun of it, but fact is that the U.S. have been experimenting with "weather weapons" for a very long time, and the U.S.A.F. have openly admitted that this weather manipulation is on their agenda.

I think the idea is not so far-fetched at all. Of course whether or not they are doing it

If the plausibility exists of an US weather modification project (HAARP for instance), then it must certainly exist for a Russian one, as well. I have read many articles over the years of the Russians playing God with the weather over Moscow and other regions over Russia. If we are talking of conspiracy then why not consider the possibility of a Russian weather modification gone bad? As far as speculation goes, this seems more plausible.

August 17, 2010 13:54

Absolutely true, and also true that both/all sides have and use this knowledge. That's why the scientist steps off of pointing the finger directly at the U.S. because he knows what is at play here. Not unlike the "foul" that gets called every time one side or the other has spies that are exposed and every yells, all the while have spies themselves. To the ones who say this is just conspiracy, your ignorance is bank to both sides. If you don't see the inherent power in being able to control the weather, and so therefore the crops, to cause compliance, then just toddle back off to sleep.

August 17, 2010 14:20

I've heard of HAARP before- I also find it interesting. Remember several years back when the US invaded Baghdad. I remember the news commentators were going on and on about the doom and gloom of the /worst/ desert sand storms in 100 years- and how this was horrible to be trying an attack during these awful storms. Is this coincidence? ...or was this by design? If you have modern sophisticated weapons - and your enemy doesn't- bad weather may hinder your army while crippling your opponent. I don't think the sand storms were a coincidence.

While I have no direct insight into the HAARP program- I do personally know one person where her father was in the US NAVY- and it was his job to generate storms. At least that's what she claims.

August 17, 2010 14:23

If the US can create ridges of high pressure in the Gulf of Mexico then would not that high pressure also mitigate the chances of destructive hurricanes entering the Gulf? If this is the case, as it seems to me to be so, why would they not always block hurricanes with high pressure systems?

It simply does not make sense.

August 17, 2010 14:41

Do you REALLY subscribe to that? If you believe that, then you probably believe that the black helicopters are coming to take you away for revealing such scandalous information. ...And let me guess, some "rogue" faction in the USAF that is totally loyal to Bush is responsible for this. Thus, some how, this is Bush's fault.

Oh, and before I forget, this so called "weapon" is called HAARP. You would fit in perfect with our conspiracy theorists in the US and the global warming nut cases. People like this assume that there are no deviations from what they define as the "average". They don't even consider other factors like the chaotic theory, Maunder Minimums, and other factors that man has no control over his environment.

August 17, 2010 15:42

I love reading the comments as it amazes me how effective the program has been to dumb down the citizens of the US and Canada for that matter. All the tin foil comments etc. just show the ignorance of people who use the Brainwashing system (TV) for education.

Is it do to their diet or all the prescription drugs or Fluoride or Mercury in vaccines or a combination of all the above that most people do not have the ability to critically think anymore.

Haarp----Is it possible to control the weather? Until someone leaks some confidential info no one really knows. But to say its crazy is very naive.

Hopefully people will begin to wake up and stop getting their info from the propaganda machine (TV) and go to the Internet while it is still there. Many sites to go to: Infowars.com, trendsresearch.com or read Jesse Venturas latest book.

People are so far out of touch with reality, I fear civilization is doomed. There is no logic or reason anymore. Now, if some normal and natural random event happens with a bad outcome...SOMEONE MUST be to BLAME. Ignore the fact that we had ½ dozen or more ice ages...with one of them completely covering the earth. Let alone the fact that we had much hotter climate 1000 years ago. Let alone that we had a much longer and hotter summer in the early 1930...we have earthquakes, volcanoes, hurricanes, tornadoes, calderas...on and on. This is a consequence of being on a dynamic and alive planet. Get over it. One could make an equally valid "Theory" that the troubles in Eastern Europe and Asia is a punishment from GOD for their Godless lifestyles....the two theories are equally based in fact!

In Response

by: **John from: Midwest**

August 17, 2010 19:00

When I was in the Air Force in 1980, we were told by the scientists and high ranking military commanders that the program we were working on, Called Operation Cloverleaf, was a " global climate control" program and that the U.S. Air Force would have TOTAL control of the weather worldwide by 2015.

Well back then, 2015 seemed like such a long time away.

Looks like they are right on schedule or perhaps even a little ahead of their schedule.

What do you think those Chem Trails are they spray above your heads everyday? Laughing gas?

They are chemicals, poisonous ones that, that manipulate the amount of sunlight reaching the lower atmospheres. These microscopic particles of Barium, Aluminum and other metals, reflect the sunlight to some degree and given an electrical charge, can upset the balance of the Earths magnetic field changing ground pressures for High to Low and vice versa.

This isn't even rocket science, it's pretty much 1st year college chemistry and physics and they are spending billions of our tax dollars every year on it.

And to boot, these chemicals are pretty much deadly to our bodies, but they don't really care too much about us, do they. It's more about world domination and global de-population.

Right now, there are just too many of us to control, about 6 billion too many and the powers that be are looking for new ways to "thin us out" because engineered viruses like H1N1, depleted Uranium on our top soil, fluoridated water, aluminum, bovine rbgbh and other injections into our meat and poultry, Aspartame, MSG, High Fructose Corn Syrup, Cell phone tower Microwave radiation, deadly vaccines, pharmaceutical drugs, and GMO foods are just not getting the job done fast enough.

That's ok though, our governments are doing everything possible to start World War III with Iran right now.

You people better wake up and start screaming at your Congress men and women and go after your local state Reps to put a stop to all this crap and to pull our of Afghanistan and Iraq.

They have purposely sent out 90% of our Army, Navy, Marines and National Guard to other countries just so there isn't a military force here that can stop what they are getting ready to do.

August 17, 2010 20:35

Well, this is no surprise, but the only nation openly bragging about having weather changing capabilities and experimenting with it is China. They did it during the Olympics, and they did it numerous times since then. It is no wonder parts of China and Pakistan are flooding and areas of India have flooded and that Russia is experiencing extremes in their weather. China is also the worst polluter in that region. So go to your next door neighbor, China, and tell China to quit fooling around with the weather. They can't change the weather but they can mess it up for all their next door neighbors in the region.

In Response

by: **Anonymous**

August 18, 2010 08:42

All you have to do is look up in the sky every once in a while and you will see the weather modification going on right over your head, geez it is that easy. You will see jet trails being laid down that hang for hours and eventually spread into wispy clouds...This is not natural. Normal contrails only last for a few seconds or minutes at most and must be laid down 25,000 to 35,000 feet so they steam can crystallize. The trails I am talking about are usually laid down from 5,000 to 20,000 feet. If you watch much at all you will see the standing wave patterns set up for some time less than an hour and then disappear. This energy comes from somewhere. Get a clue people, are we really that stupid they can be doing right overhead most days and people do not see it with their own eyes and call people who do crazy? the plants on this forum know the truth, that is why they are being paid to write stuff on here to keep the human livestock stupid. They have to keep it secret because of the liabilities they cause by playing God with our limited rainfall capacities, places with drought could sue if the truth ever got out...

In Response

by: **Chad** from: **Hampton, USA**

August 18, 2010 10:32

In Response

by: **Kyle B** from: **Toronto, Ontario**

August 18, 2010 12:03

Well, that increased pressure could be from an increase of heat in that general area. That heat could be produced by the fact there is endless gallons of oil sitting in the ocean. Oil is dark in color, so its just like wearing all black clothing, or sitting black car with black leater interior on a really hot summers day. Also, no doubt are countries interested in weather manipulation. If were are to ever fix the climate into a state where the world isnt going to eventually collapse, than its important to research the appropriate measures to do that.. However, i do not believe the current weather is a result of any such technology. I believe thats due to plain and simple human ignorance, luxuries of life, machines of industry, plain old self indulgence. So in the end, its the world to blame, not Americans

In Response

by: **DB** from: **US**

August 18, 2010 13:18

by: **gipbrown** from: **NY - USA**

August 18, 2010 15:38

I would just like to add to this - During the Olympics in China, in an effort to ensure ideal weather, they too engaged in an effort to control the weather which resulted in some interesting weather conditions and abnormal patterns in the north eastern US.

In Response

by: **Brian** from: **Maine**

August 18, 2010 16:40

Why is it so hard to believe they we don't have the technology to change weather?

We have the ability to deface large landscapes
We have the ability to build artificial islands
We have the ability to extract oil miles beneath the surface
We have the ability to travel into space
We have satellite in space that can see a penny on the ground
We can build nuclear bombs that can wipe out an entire state (nevermind a city)

It only seems logical that humans would want to alter weather if possible, and I'm sure it's possible. There have been many techniques used to alter rain clouds by dropping small tablets from planes. Scientist want to put thousands of small mirrors in space to alter sunlight on the earth. I'm sure if it can be done, it's been done. This is the 21st century, not the stone age.

Only a fool would believe that altering the weather is not possible, and a bigger fool would believe humans wouldn't take advantage of such technology.

In Response

by: **Common Sense** from: **USA**

August 18, 2010 17:01

It is true that for many years BOTH the Russians and US have had programs to influence the weather, whether they were successful or not is too soon to tell. There are many theories on HAARP, this is just one. The Russians have their own equivalent machinery.

In reality, this is just more Cold War rehortic from the Russians. They often make use of calamities to blame 'those capatilists in the US'. Hence, propaganda appears in Africa blaming the CIA for aids, propaganda appears in Haiti blaming the US for earthquakes, and now propaganda appears in Russia blaming the US on the heat wave. Much is said in the press about the US and CIA and torture tactics. Never does anyone mention the KGB's long history in that area or mention their replacement organization.

It is absolutely reasonable to consider such programs - JFK ominously talked about secret projects to control the weather in speeches 50 years ago. He was POTUS so he probably knew a thing or two.

It is ABSOLUTE KNOWN FACT that China has successfully experimented with seeding clouds with silver nitrate to produce rain. Whoever said 'only God can control the weather,' you have been PROVEN wrong - by China, who is not even mentioned in this article.

August 19, 2010 06:44

I agree. People are quick to think 'conspiracy theory' when anyone says HAARP can be used for something other than studying the northern lights. LOL! AS IF the USAF and the USN would jointly build a billion dollar project just to study such a thing. The patents filed for HAARP are quite interesting, especially the last one. Surprise. The military develops weapons - fancy that.

Method And Apparatus For Altering A Region In The Earth's Atmosphere,
Ionosphere, And/Or Magnetosphere
Inventors: Eastlund; Bernard J., Spring, TX
Assignees: APTI, Inc., Los Angeles, CA

Issued: Aug. 11, 1987

Filed: Jan. 10, 1985

U.S. Patent 5038664:

Method For Producing A Shell Of Relativistic Particles At An Altitude Above The Earth's Surface

Inventors: Eastlund; Bernard J., Spring, TX

Assignees: APTI, Inc., Washington, DC

Issued: Aug. 13, 1991

Filed: Jan. 10, 1985

U.S. Patent 4712155:

Method And Apparatus For Creating An Artificial Electron Cyclotron Heating Region Of Plasma

Inventors: Eastlund; Bernard J., Spring, TX

Ramo; Simon, Beverly Hills, CA

Assignees: APTI, Inc., Los Angeles, CA

Issued: Dec. 8, 1987

Filed: Jan. 28, 1985

U.S. Patent 5068669:

Power Beaming System

Inventors: Koert; Peter, Washington, DC

Cha; James T., Fairfax, VA

Assignees: APTI, Inc., Washington, DC

Issued: Nov. 26, 1991

Filed: Sep. 1, 1988

U.S. Patent 5218374:

Power Beaming System With Printer Circuit Radiating Elements Having Resonating Cavities

Inventors: Koert; Peter, Washington, DC

Cha; James T., Fairfax, VA

Assignees: APTI, Inc., Washington, DC

Issued: June 8, 1993

Filed: Oct. 10, 1989

U.S. Patent 5293176:

Folded Cross Grid Dipole Antenna Element

Inventors: Elliot; Paul G., Vienna, VA

Assignees: APTI, Inc., Washington, DC

Issued: Mar. 8, 1994

Filed: Nov. 18, 1991

U.S. Patent 5202689:

Lightweight Focusing Reflector For Space

Inventors: Bussard; Robert W., Manassas, VA

Wallace; Thomas H., Gainesville, FL

Assignees: APTI, Inc., Washington, DC

Issued: Apr. 13, 1993

Filed: Aug. 23, 1991

U.S. Patent 5041834:

Artificial Ionospheric Mirror Composed Of A Plasma Layer Which Can Be Tilted

Inventors: Koert; Peter, Washington, DC

Assignees: APTI, Inc., Washington, DC

Issued: Aug. 20, 1991

Filed: May. 17, 1990

U.S. Patent 4999637:

Creation Of Artificial Ionization Clouds Above The Earth

Inventors: Bass; Ronald M., Houston, TX

Assignees: APTI, Inc., Washington, DC

Issued: Mar. 12, 1991

Filed: May. 14, 1987

U.S. Patent 4954709:

High Resolution Directional Gamma Ray Detector

Inventors: Zigler; Arie, Rishon Le Zion, Israel

Eisen; Yosset, Rishon Le Zion, Israel

Assignees: APTI, Inc., Washington, DC
Issued: Sep. 4, 1990
Filed: Aug. 16, 1989

U.S. Patent 4817495:
Defense System For Discriminating Between Objects In Space
Inventors: Drobot; Adam T., Annandale, VA
Assignees: APTI, Inc., Los Angeles, CA
Issued: Apr. 4, 1989
Filed: Jul. 7, 1986

U.S. Patent 4873928:
Nuclear-Sized Explosions Without Radiation
Inventors: Lowther; Frank E., Plano, TX
Assignees: APTI, Inc., Los Angeles, CA
Issued: Oct. 17, 1989
Filed: June 15, 1987

US Military is DEFINITELY interested in weather modification. The HAARP Naval facility is online in Alaska and the godfather is Bernard Eastlund, who said:

"In my opinion, the new technology for use of artificial plasma layers in the atmosphere: as heater elements to modify steering winds, as a modifier of electrostatic potential to influence lightning distribution, and for generation of acoustic and gravitational waves, could ultimately provide a core technology for a science of severe weather modification," Eastlund told SPACE.com.

http://www.space.com/scienceastronomy/051031_mystery_monday.html

and here's the Navy's brief from their website:

by: **Jason** from: **USA**

August 17, 2010 16:35

[Reply](#)

Has anyone on here actually went to the official HAARP website? They acknowledge their ability to alter the atmosphere. It is totally plausible that this administration is causing the increase in temperatures. This would help to reignite the global warming debate that is losing support around the world. There are many powerful people in our government that stand to profit billions by enacting a climate change bill in this country.

In Response

by: **McWayne** from: **NYC**

August 17, 2010 16:40

[Reply](#)

The US is directly responsible for the opium epidemic. Russia has pleaded nonstop with the UN to stop or at the very least limit the United States-Afghan opium production — opium the US admits it grows, protects and harvests — at the expense of the US taxpayer.

As far as the United States ability to modify weather, they've been doing it since Vietnam where they would use rain to wash out roads and flood tunnels.

13 years ago Bill Clintons Sec. of Defense William Cohen admitted the ability to "alter the

climate, set off earthquakes, volcanoes remotely through the use of electromagnetic waves" was possible.

<http://www.defense.gov/transcripts/transcript.aspx?transcriptid=674>

Guess who owns the largest electromagnetic conductor? The US. It is called HAARP.

August 17, 2010 19:06

In March 2005 the senator that supposedly represents me introduced "Weather Modification Research and Technology Transfer Authorization Act of 2005 (S.517), 1st Session, 109th Congress, on the floor of the U.S. Senate. The bill would establish the Weather Modification Operations and Research Board to overlook weather modification research.

On December 8, 2005, the bill was placed on the Senate Legislative Calendar under General Orders. Calendar No. 319.[2]" I don't believe this bill passed but if it was introduced into the Senate you can bet it's been done behind the scene for years. It is also forbidden by the U.N. to use weather modification as a "weapon" - Resolution 31/72, TIAS 9614 Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques. This was adopted back in 1976. Also, just doing an internet search for "weather modification patents" can be very enlightening.

[http://www.sourcewatch.org/index.php?](http://www.sourcewatch.org/index.php?title=Weather_Modification_Research_and_Technology_Transfer_Authorization_Act_of_2005)

[title=Weather_Modification_Research_and_Technology_Transfer_Authorization_Act_of_2005](http://www.sourcewatch.org/index.php?title=Weather_Modification_Research_and_Technology_Transfer_Authorization_Act_of_2005)

Americans had better wake up and "brain up" before it's too late.

Weather modification exists.

USAF 'Owning The Weather
By 2025' -

WEATHER AS A FORCE MULTIPLIER: OWNING THE WEATHER IN 2025
MILITARY APPLICATIONS OF WEATHER MODIFICATION

In 2025 US aerospace forces can "own the weather" by capitalizing on emerging technologies and focusing development of those technologies to warfighting applications. Such a capability offers the warfighter tools to shape the battlespace in ways never before possible. It provides opportunities to impact operations across the full spectrum of conflict and is pertinent to all possible futures. The purpose of this paper is to outline a strategy for

the use of a future weather modification system to achieve military objectives rather than to provide a detailed technical road map.

A high risk/high reward endeavor, weather modification offers a dilemma not unlike the splitting of the atom. While some segments of society will always be reluctant to examine controversial issues such as weather modification, the tremendous military capabilities that could result from this field are ignored at our own peril. From enhancing friendly operations or disrupting those of the enemy via small-scale tailoring of natural weather patterns, to complete dominance of global communications and counter-space control, weather modification offers the warfighter a wide range of possible options to defeat or coerce an adversary.

Technology advancements in five major areas are necessary for an integrated weather modification capability: (1) advanced nonlinear modeling techniques, (2) computational capability, (3) information gathering and transmission, (4) a global sensor array, and (5) weather intervention techniques. Some intervention tools exist today and others may be developed and refined in the future.

Current technologies which will mature over the next thirty years will offer anyone who has the necessary resources the ability to modify weather patterns and their corresponding effects, at least on the local scale. Current demographic, economic, and environmental trends will create global stresses that provide the impetus necessary for many countries or groups to turn this weather modification ability into a capability. In the US, weather modification will likely become a part of national security policy with both domestic and international applications. Our government will pursue such a policy, depending on its interests, at various levels. These levels could include: unilateral actions, participation in a security framework such as NATO, membership in an international organization such as the UN, or participation in a coalition. Assuming that in 2025 our national security strategy includes weather modification, its use in our national military strategy will naturally follow. Besides the significant benefits an operational capability would provide, another motivation to pursue weather modification is to deter and counter potential adversaries.

In this paper we show that appropriate application of weather modification can provide battlespace dominance to a degree never before imagined. In the future, such operations will enhance air and space superiority and provide new options for battlespace shaping and battlespace awareness. "The technology is there, waiting for us to pull it all together;" in 2025 we can "Own the Weather."

Not so fast in countering this Rusky's position. It is a known fact that the USA has had this HAARP (That's High Frequency Active Auroral Research Project) in action since the early days of the fall of the USSR.

Based in Gakona, Alaska, HAARP is a mega antenna field the size of several football fields in the wooded marshlands of central Alaska. It's purpose is to experiment with the atmospheric conditions through triangulation of its ELF (Extra Low Frequencies) to a satellite in space and a ship at sea. By doing so, they can heat up the atmosphere or any point on the earth , under the earth or under the ocean waters. There have been allegations of this project being so advanced in its ability to conduct its energy experiments that it has heated up the seas, changed the course of El Nino and La Nina, even directing the eye of hurricanes (Katrina anyone?) and creating underground and sea vibrations that could crack Tectonic plates and create devastating earthquakes and sea quakes (Tsunami 2004 anyone?)

Check out Nick Begich's "Angels Don't Play this HAARP" It cam eout in the 1990s.

those who think this is not true think again , U.S has been working on this for YEARS!!!! since the 60,s the united states of america is a snake bitten evil empire ran by a bunch of hell bound crooks , idiots like George Soros , Al Gore , the Clintons , Bushes, Rothchilds , Rockefellerers and a bunch other new world order crooks over seas , lets not for get the Federal Reserve , banking industry ,... all of these people and who are linked with them and there are many those sons of bitches are headed fast for hell. Americans are as stupid as there asses , they keep sucking down and gulping down poison food and water and listening to lying political leaders and media ,.. Americans keep there head in the sands and turn there head the other way when some one tells them the truth . Americans do not talk politics and religon , the Churches of America have been silenced since 1957 IRS bill 5013c , many main stream faiths sign this tax exemption that does not allow a pastor to talk about political matters from his pulpit . yes , churches traded truth for money . the good and faithful side are dummies and can not believe our country leaders would do such terrible things AMERICANS are in for a big surprise .

Yes. I shall simply tell is a genetics of a weak brain which always wishes to accuse the clever and democratic person of the sins. The effect of the cretin with feeble-minded legal system simply searches so guilty. In Russia not so long ago broadcast film about hydrocarbonic "cretin" the person. And as consequence has come to reap time hydrocarbonic bonuses in the form of thermal effect. Take and try to lead an exhaust pipe of the car to a premise and sweep up rise in temperature. Simply due to destruction of clever and decent people in Russia the feeble-minded and corrupted system of today's Russia does not remain fair and as consequence of clever people which could resist to hydrocarbonic ruling cretins. Simply feeble-minded corrupted legal system of cretins of authority in Russia has destroyed decent and clever people. In fact only the clever and decent person could solve problems in Russia. And it too to name usual clients of a madhouse a satan - they it is simple cretins.

Check out HAARP in Alaska, it has the ability to heat up the ionosphere by firing a concentrated beam of energy directly into it. The technology was actually developed by Croatian engineer Nikola Tesla.

Defense Advanced Research Projects Agency (DARPA) has their hands on it too which is NOT a good thing. They are responsible for creating some of the most devastating technologies that our military uses today.

What can you say after that? Lunatics have always been in abundance in Russia...no news there.

by: **Aleida** from: **Arecibo Observatory**

[Reply](#)

July 31, 2010 16:10

In March 26, 2008, MR. Peter Theeter, Director of the Defense Advanced Research Project Agency, DARPA, informed the US Congress that Sleight of HAND, SOH, was taking place. This is at page 22 of his report. SOH is an outgrowth of HAARP according to page 254 of DARPA's annual budget for 2005. The goal of SOH is to inject very low frequency radiation at the Arecibo Geomagnetic Conjugate Point with Aregentina. WHY?

Because in 1958 Project Argus, a series of nuclear detonations in the high atmosphere contaminated the Van Allen Belts with nuclear radiation in the South Atlantic. Now, that radiation is destroying the circuits of satellites. HAND stands for High Altitude Nuclear Detonation. The goal is to "clean" the mess. It is being cleaned over our heads, crops, hospitals, schools, etc. A CRIME. An act of ECOTERRORISM. Against the whole planet.

My hometown is being used for the "cleaning" . Here is the document:

<http://www.docstoc.com/docs/20870176/Ionospheric-Effects-Caused-by-4075-kHz-Whistler-mode-Waves-over>. The grants for operating are Grant ONR-N00014-05-1-0109 and N00014-7-1-0999 of HAARP at Massachusetts Air Force Base.

I'm not a conspirationist theorist. I just read. also, I observe the environment around me. There is unusual heat during the night.

Everyday we have chaff, that is a metallic compound to alter the atmosphere. We challenged the Arecibo Observatory personell. Mr. Robert Kerr, Director of the National Artmospheric and Ionosphere Center admitted in August 3, 2007 that the US Department of Defense is in Arecibo. This information is posted at www.naic.edu in that date. The radar's military name is National Atmospheric and ionosphere Center. There is a military base.

Puerto Ricans are the only people in the world that have attacked the US Congress. We are the only ones to destroy 11 planes in a base in a military operation. We are the only ones to have used human bodies as shields to protect our island of Vieques from contiuous bombing. They had to leave Vieques and Roosevelt Roads. We are not conspiracionist. We are people struggling for freedom from colonialism.

And a colonial state is what is going to be imposed over humanity if you don't read, learn, and struggle.

The term conspirationist theory is developed to get people to dismiss what is really happening. If you study their budgets you don't have to digress into whether it is an accurate information.

HAARP is a conspirationist theory that has swallowed well over 250 million dollars? What a conspiracy!!

In Response

August 17, 2010 13:43

My compliments to you Aleida. Puerto Rico should have had full states rights many years ago. I served in Vietnam with guys from there. Brave guys. And the people of Puerto Rico deserve better treatment from Washington DC. I don't really buy into conspiracies. Many people here on the mainland still insist that Bush conspired to do 911. Feeble minds. Could be the years of hard drugs. or the effects of isolation, living under tin foil and eating food cooked in tin foil. China is far ahead of us in developing eco "weapons" so to speak. They have been using technologies to produce rain for their people. The results were the floods that required them to open the locks at their worlds largest dam they just finished. Coincidence? I think not. We know they wanted the dam filled to test the capacity, and the "sudden rains" allowed that to happen in a few days. As for the high pressure off the Gulf during the cleanup, if that were even remotely true that the current administration did such a thing, there would be a revolt from the people who supported him because of the extreme betrayal. And it would undermine all civil control nation wide. So, I doubt this happened. IMHO

August 18, 2010 05:03

Thanks Aleda!

Really interesting news you give to us. There is so much people they see only not to far before the noze and walk everyday like donkey running for carrot.

So I'm a bloody french with open mind who well know how people can be manipulate and controled with biazed news. HARRPS, Tesla device, weather manipulation for military purpose are in the agenda for now and so on. We not talking about a specific country using this technology because each nuclear power havent done their research (USA, Russia, France, etc). Everebody knows about the fact if they could produce weather change, they can control. So for the others they don't believe in weather control, stop watching CNN and start open your minds! The real world is not what you see.

The poster is not referring to Tesla with "she." Russia is called "Rodina" or "Motherland" by it's natives. At one time Americans also referred to their country as a "she."

In Response

by: **LocalYokle** from: **USA**

August 18, 2010 00:25

Regardless of any misused pronoun the Tesla Effect has been around for a hundred years.

Tesla had 200 US patents and demonstrated the effect of low frequency directed to the ionosphere in 1908. Because of the potential of his discovery he distributed the data involved in the phenomena in five parts to the US and four European powers. In 1977 a number of Tesla designed coil devices manufactured in the USA were sold to the USSR to be powered by one or more of its Kama River hydroelectric plants.

Their system created a magnet field high in the atmosphere causing the jet streams to alter course and push unseasonal cold fronts across Alaska and into central USA. For some strange reason such a front became known as a Siberian Express. Sorry Areshev but Sputnik wasn't their last first and Washing knew it was coming too.

In Response

by: **Rik** from: **Middle of Nowhere,Squared**

August 19, 2010 01:40

Tesla proved in 1908? Wasn't the Tunguska blast in June of 1908?

Konstantin is an awful poet and has way too much to say,
He thinks he can make his point from a computer in LA,
He likes to make his crazy rhymes to keep responders away,
He must not really have a life if it's all he does all day!

Russia, as we've all been told is a fine democracy,
But yet one day it will be the truth that we will see,
Imperial ambitions and brute power are what's really in disguise,
While the Kremlin brainwashes the entire world with all of its lies!

Me, I like to post messages to shed light on all those lies,
It seems nobody regarding Russia wants to criticize,
So I've taken it upon myself to tell the world they're being deceived,
When people finally change their minds, I will finally be relieved.

I'm a better poet,
And now you know it,

Touché Konstantin? (lol)
