Verification of Assets (VOA)

Asset Verification Made Simple

Today, verifying an applicant's assets, especially for applicants with complex finances, can be tedious and frustrating for both you and the applicant.

The CoreLogic Verification of Assets (VOA) solution digitizes, automates and streamlines the asset verification process.

Seamless, Fast Verifications

With the CoreLogic VOA solution, applicants simply connect to their financial institutions through our easy-to-use UI and can share their asset data with you in minutes.

Verify Identity   Register with CoreLogic   Connect Financial Institutions

Advanced Security and Privacy

Whether the applicant is connecting directly to his or her financial institutions, or documents are manually uploaded, the VOA solution is enabled with the industry-grade security and privacy technology such as:

- Strong Data Encryption
- Multi-Factor Authentication (MFA)
- Virus Scanning

Reduce Origination Costs and Speed Up Time to Close

CoreLogic can efficiently connect you and the applicant during the asset verification process by:

Accelerating Your Workflow

- Easy to Use – Our easy three-step process and intuitive UI connects you, the applicant and the financial institutions in one convenient place.
- Increased Efficiencies – Obtaining asset data directly from financial institutions can help eliminate the time wasted from the repetitive back and forth between the applicant, lender and financial institution.

Product Highlights

- Comprehensive VOA Solution that Reduces Origination Costs and Speeds Up Time to Close
- Quick and Easy Three-Step Process
- Real-Time Data from the Source
- Option to Upload Documents
- Advanced Security and Privacy
- Unlimited Data Reverification for 60 Days

corelogic.com

- **Automated Analysis** – Once connected, the applicant's asset data is automatically pulled from checking, savings, and investment accounts, and consolidated into one convenient asset report in minutes.

Improving Reliability

- **Fraud Reduction** – By obtaining borrower asset information directly from financial institutions in real time, you can confidently rely on the applicant's asset data you receive.

- **Data Reliability** – By eliminating manual data entry, VOA prevents "fat-finger" data entry mistakes and streamlines the QC process.

Providing Unlimited Data Reverification for 60 Days

- **Reverify Data for Free** – No more waiting for account statements. Refresh asset data for up to 60 days without incurring an additional re-ordering fee (as long as the applicant has not withdrawn consent).

The result? Compiling all the applicant's asset data takes minutes, not weeks.

Robust and Valuable Insight in Every VOA Report

- Analyzes both depository and investment accounts
- Provides historical average balances
- Lists the overall account transaction history
