

# Verification of Assets (VOA)

## Asset Verification Made Simple

Today, verifying an applicant's assets, especially for applicants with complex finances, can be tedious and frustrating for both you and the applicant.

The CoreLogic® Verification of Assets (VOA) solution digitizes, automates and streamlines the asset verification process.

### Seamless, Fast Verifications

With the CoreLogic VOA solution, applicants simply connect to their financial institutions through our easy-to-use UI and can share their asset data with you in minutes.

Verify Identity

Connect Financial Institutions

### Product Highlights

- Comprehensive VOA Solution that Reduces Origination Costs and Speeds Up Time to Close
- Quick and Easy Three-Step Process
- Real-Time Data from the Source
- Option to Upload Documents
- Advanced Security and Privacy
- Unlimited Data Reverification for 60 Days

### Advanced Security and Privacy

Whether the applicant is connecting directly to his or her financial institutions, or documents are manually uploaded, the VOA solution is enabled with industry-grade security and privacy technology such as:

- Strong Data Encryption
- Multi-Factor Authentication (MFA)
- Virus Scanning

### Reduce Origination Costs and Speed Up Time to Close

#### Accelerate Your Workflow

- **Easy to Use** – Our easy three-step process and intuitive UI connects you, the applicant and the financial institutions in one convenient place.
- **Increased Efficiencies** – Obtaining asset data directly from financial institutions can help eliminate the time wasted from the repetitive back and forth between the applicant, lender and financial institution.

## Improve Reliability

- **Fraud Reduction** – By obtaining borrower asset information directly from financial institutions in real time, you can confidently rely on the applicant's asset data you receive.
- **Data Reliability** – By eliminating manual data entry, VOA prevents "fat-finger" data entry mistakes and streamlines the QC process.

## Provide Unlimited Data Reverification for 60 Days

- **Includes Data Reverification** – No more waiting for account statements. Refresh asset data for up to 60 days without incurring an additional re-ordering fee (as long as the applicant has not withdrawn consent).

The result? Compiling all the applicant's asset data takes minutes, not weeks.

## Robust and Valuable Insight in All VOA Documents

- Analyzes both depository and investment accounts
- Lists the overall account transaction history for 60 Days
