### **VOA Bethany Relay Station:**

#### beaming across the Iron Curtain

- Broadcast <u>VOA</u> to Europe, South America & Africa
- Located near WLW-AM site in Mason, OH
  - **◆** A "must-visit" for Dayton Hamvention attendees!
- Opened in 1944
  - Intended as backup for East Coast VOA relay sites
  - ♦ 8 SWBC transmitters: 250, 175 and 50 kW
  - Original transmitters built by Crosley Broadcasting Corp.
  - ◆ Initially broadcast into Axis-occupied Europe
  - ◆ Hitler denounced VOA as "those Cincinnati liars"!
- Relayed VOA programming in many languages
  - Studios in NYC until 1954, then moved to Washington DC
  - Retired and shut down in 1994; towers removed 1997-98

# This is what the VOA was up against during WW2

## "Tell the truth and let the world decide."

- After WW2, VOA mission adapted to Cold War.
  - Multi-lingual programming continued, but many new languages were added.
  - ◆ Broadcasts to P.R. China and Asia ramped up significantly after 1949, mainly from sites in Philippines and Japan.
- Soviet and Chinese jamming became very refined.
  - **◆** This necessitated major equipment upgrades at VOA sites.
  - New developments in frequency synthesis and power-tube technology led to frequency-agile high-power transmitters.
  - Station engineers could now QSY in minutes or even seconds, rather than several hours. Down-time was minimal.
  - Automatic antenna switching and broadband antennas also facilitated rapid frequency/beam heading changes.

## The VOA Bethany building

Front of the restored building, viewed from the driveway

# Historical marker & description

THE VOICE OF AMERICA BETHANY STATION During the height of World War II. President Franklin Roosevelt turned to the innovative engineers of the Crosley Broadcasting Corporation to build powerful short wave radio transmitters capable of delivering broadcasts overseas. On farm fields near Crosley's WLW facility, six 200 kilowatt transmitters and 24 directional reentrant rhombic antennas were built and on September 23, 1944, the Voice of America Bethany Station was dedicated. The first broadcast was directed at Nazi Germany and began with, "We shall speak to you about America and the war. The news may be good or it may be bad, but we will tell you the truth." For more than fifty years, the Voice of America Bethany Station delivered "truthful news" to the people of Europe, Africa, South America, and parts of Asia, despite some like Adolf Hitler who referred to the VOA as those "Cincinnati Liars." New technology and budget cuts resulted in the silencing of the Bethany Station in 1994. OHIO BICENTENNIAL COMMISSION, THE LONGABERGER COMPANY WEST CHESTER TOWNSHIP THE OHIO HISTORICAL SOCIETY

## **Antenna switching field**

manual switches; at rear of main bldg.

Feedlines from transmitters were in buried conduits.

### **Antenna switch field detail**

Note copper busbars & steatite insulators

Engineers walked outside to reconfigure switches manually!

### **Mains service cubicle**

\*\*\* not too many interlocks in those days!

14.4kV 3-phase isolators

**Voltage/current transformers** 

## **Crosley transmitters, 1968**

In service 1943 – 1968; replaced by Collins

2 July 2015

NSARC HF Operators – VOA Bethany

## **Crosley MW/SW receiver dial**

"American Overseas" console model

2 July 2015

NSARC HF Operators – VOA Bethany

### **Collins 821S-1 transmitter**

250 kW, PLL exciter, frequency-agile

One of the two 821S-1's is still on-site. Note mimic diagram.

## **Collins 821S-1 diagnostic panel** *Mimic diagram provides operating flowchart*

NE CONTROL CENTER

THE THIRD CONTROL CENTER

This panel presents the start-up sequence and operational status of all audio and RF stages.

#### **821S-1** remote control consoles

Frequency selection & transmitter supervision from control room

## Control room, 1950

Crosley transmitter bays to left & right of control position

## Control room, 1960's

**Collins** transmitter consoles on right

## View of main control console (current)

Meters & faders for program feeds to multiple regions

## **Detail of fader panel**

Meters: % modulation (upper), VU (lower)

## **Detail of program switching matrix**

BY-1, BY-2 etc. = Bethany 1, 2, etc. transmitter number

## Program line equipment in control room (line amplifiers etc.)

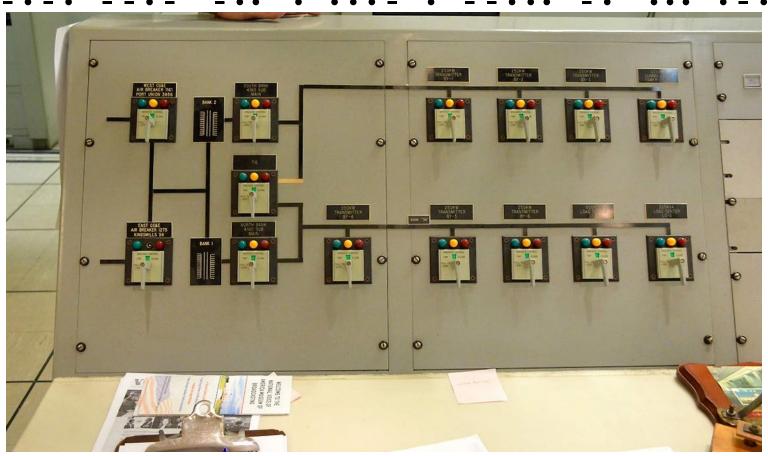

Program lines originally AT&T wirelines, later satellite feed

### Mains power switching console

Controls mains supply from 2 HV utility feeders to 8 transmitters

## Former satellite earth station: was used for program feeds

Amateur radio club now uses satellite dish for EME

## Amateur radio antenna tower used by West Chester ARA, <u>WC8VOA</u>

HF Yagi & wire antennas on tower

in Bethany transmitter building

**HF Position 3 (digital)** 

in Bethany transmitter building

**VHF/UHF Position 4** 

#### **Notes on WC8VOA:**

- Visit WCARA (WC8VOA) Website
- WC8VOA Repeater: Yaesu Fusion DR-1
  - **◆** 145.390 MHz, -600 kHz, carrier access

- Equipment conservation:
  - Plans to restore vintage Collins, Drake and other equipment in museum collection & add a working vintage operating position
